Product Designer with 5 years of experience in UI/UX, digital product development, and design systems. Skilled in User-Centered Design (UCD), Design Thinking, and data-driven strategies. Adept at collaborating with development teams to create seamless, intuitive, and high-impact user experiences.

EXPERIENCE

Hesabo, Tehran — Product Designer

Jun 2022 – Present

Hesabo is an Earned Wage Access (EWA) platform that lets employees access earned wages before payday. I design end-to-end experiences and information architecture for KYC, bank card applications and issuance, subscription plans, and employer/admin platforms, working closely with developers, product managers, business stakeholders, and other teams.

- Designed and developed a comprehensive design system, ensuring consistency and efficiency across products.
- Conducted usability testing, A/B testing, and user research, leading to improved user retention and engagement.
- Led redesign and rebranding efforts, significantly enhancing product usability and aesthetics.
- Collaborated with engineering, business, and product teams to align design goals with business objectives.

Key Achievements:

- Increased user engagement by 35% through a complete UI/UX redesign and usability improvements, optimizing the salary withdrawal process.
- Shortened the salary withdrawal process by 25% by streamlining user flows and implementing a more efficient navigation system based on user behavior analysis.
- Developed a customized design system, reducing front-end development time and ensuring consistent UI across all platforms.
- Increased subscription purchases by redesigning plan cards to highlight savings and benefits more clearly, based on user research and beta feedback.

Sarmo Style, Remote — Product Design Consultant

Apr 2022 – Present

As a Product Design Consultant at Sarmo Style, a women's fashion e-commerce platform, I focus on improving user experience, optimizing shopping flows, and increasing conversion. Collaborated closely with the marketing team on multiple campaigns and worked with SnappPay to enhance the shopping experience, contributing to Sarmo Style's recognition among SnappPay's top stores.

Key Achievements:

- **Style the Look:** Designed complementary product recommendations in the add-to-cart flow, resulting in a 15% increase in completed purchases.
- **Product Discovery:** Improved product browsing through category-based navigation, helping customers discover products faster and reducing reliance on search.

Asanito, Tehran — UI/UX Designer

Jun 2022 – Mar 2023 (10 mos)

Designed and improved user experiences for an enterprise CRM platform.

Created high-fidelity UI prototypes and refined usability through iterative design processes.

Conducted UX research and prototyping, improving customer onboarding and feature adoption.

Key Achievements:

- Designed an in-app calling system to simplify customer follow-ups.
- Designed a form builder that lets clients create and customize forms for internal processes.

Freelance Product Designer, Remote — UI/UX Designer

Oct 2021 – Jun 2022 (9 mos)

Worked as a UI/UX Designer on multiple freelance projects across fintech, e-commerce, and SaaS platforms, collaborating with diverse teams to create intuitive and high-impact digital experiences.

Key Achievements:

- Improved usability across multiple platforms, refining navigation and interaction flows for a smoother user experience.
- Redesigned and updated UI to enhance user experience and align with modern design standards.

Jabama, Tehran — Employee Experience Designer (EXD)

Jan 2021 – Oct 2021 (10 mos)

At Jabama, I worked as an Employee Experience Designer (EXD), focusing on improving the overall employee experience through user-centered design (UCD), research, and digital solutions. My role involved identifying pain points, optimizing internal tools, and enhancing engagement within the organization.

Key Achievements:

- Redesigned internal tools, streamlining HR processes and boosting efficiency.
- Improved onboarding, helping new hires adapt faster with interactive guides.
- Optimized internal communication, enhancing information flow and engagement.
- Increased employee satisfaction by resolving key pain points.
- Boosted retention and loyalty through better onboarding and workplace tools.

Education

Master's Degree in Industrial Design

(In Progress)
Azad University, Central Tehran Branch

Bachelor's Degree in Industrial Design

Azad University, Tehran South Branch

Skills & Tools

Product Design & UX Research

User Research, Wireframing, Prototyping, User Flows
Usability Testing, A/B Testing, Data-Driven Design
UX Writing, Accessibility Design

Design Systems & UI Development

Design Systems Creation & Management
Figma Auto Layout, Component Libraries, Tokens & Variables

Tools & Technologies

Design: Figma, Sketch, Adobe XD
Collaboration: FigJam, Miro, Jira
User Analytics: Clarity, Google Analytics

AI in Design

AI Agents: Set up agents with clear instructions, design guidelines, and project requirements.
Design Workflow: Use AI for UX writing, research, ideation, and visual design.
Quality Control: Review and refine AI outputs to meet design standards and project goals.

Projects

I have worked on 10+ projects across fintech, e-commerce, healthcare, and social platforms.
Here are some notable ones:
Charisma Crowd – Created a crowdfunding platform to optimize user engagement.
Nazari Cake – Created an e-commerce platform for an online cake business.
Sarmo Store – Developed an e-commerce website with an improved checkout experience.
Qursat – Designed a medication management app for better prescription tracking.
Tadatoon – Designing a user-generated content platform to educate children aged 5 to 12 through AI-powered storytelling.
Voices to Action – Designed a campaign-based app for advocacy engagement.

Portfolio & Development

Designed and built my portfolio from scratch with React, using OpenAI Codex for AI-assisted development.
